ASHISH KUMAR

Bengaluru, Karnataka | +91-9113458404 | ashishmandal1889@gmail.com

GitHub | LinkedIn | LeetCode

Computer Science undergraduate graduating in 2027, focused on AI/ML and Generative AI, with experience building LLM-powered applications, backend APIs, and full-stack projects.

Technical Skills

Programming: Python, Java, JavaScript, SQL
CS Fundamentals: Data Structures and Algorithms, OOP, DBMS
Machine Learning: Machine Learning, Deep Learning fundamentals, Statistics, NumPy, Pandas, scikit-learn
Generative AI: LLMs, Gemini API, OpenAI API, Prompt Engineering, LLM-powered applications, Agentic AI fundamentals
Frameworks and APIs: React, Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, Firebase Authentication, Firestore
Cloud and DevOps: AWS fundamentals, Cloud Computing, Docker, Git, GitHub, GitHub Actions fundamentals, MLOps fundamentals

Projects

MindFlow AI – AI-Powered Reflection Platform | GitHub | Live Demo — Project

Node.js, Express.js, JavaScript, Firebase, Firestore, Gemini API, Docker

- Developed an AI-powered reflection platform using Gemini to generate contextual responses, analyze sentiment, and create actionable SMART goals.
- Implemented Google Sign-In using Firebase Authentication and persistent, user-specific conversation history with Firestore.
- Built REST APIs for AI chat, reflection analysis, and action generation using a modular Node.js and Express.js backend.
- Containerized the application with Docker and deployed the live prototype on Render.

SentinelSOS – AI-Powered Women Safety System | GitHub — Team Project

Python, FastAPI, React Native, PostgreSQL, Pytest, Docker, GitHub Actions

- Contributing to a women's safety application featuring emergency SOS, trusted contacts, location sharing, and ML-based area risk analysis.
- Coordinating integration between the mobile application, FastAPI backend, PostgreSQL database, and machine learning components.
- Working on automated API testing, Docker-based development environments, and GitHub Actions workflows for continuous integration.
- Exploring IoT-based emergency alerts using a physical SOS button, GPS, and cellular connectivity.

Narrivox AI – AI-Powered YouTube Script Generator | GitHub | Live Demo — Team Project

Generative AI, API Integration, Web Application

- Developed an AI-powered application that generates YouTube video scripts from user-provided topics.
- Integrated a generative AI API to produce structured, topic-relevant content based on user prompts.
- Built an interactive interface for submitting topics and viewing AI-generated scripts.

Education

SEA College of Engineering and Technology — Bengaluru, Karnataka
Bachelor of Engineering in Computer Science and Engineering — *2023 – 2027*

CGPA: 7.8/10 **University:** Visvesvaraya Technological University (VTU)

Training & Workshops

Code Unnati Program – SAP and Edunet Foundation
Machine Learning training and exposure to emerging technologies.

Certifications

Artificial Intelligence Fundamentals – IBM SkillsBuild (Sep 4, 2024)
Building RAG Apps Using MongoDB – MongoDB (Oct 22, 2026)
Data Analytics Essentials – Coursera (Jul 28, 2023)
Observability for AI Agents – MongoDB (Oct 22, 2026)

Publication

Smart Waste Monitoring System for Sustainable Smart Cities. International Journal Research Publication Analysis (IJRPA), Volume 2, Issue 1, January 2026. DOI: 101555/ijrpa.5184

Achievements

Solved 100+ DSA problems on LeetCode; participated in Aptos Ctrl+Move and KRNL Dekoded hackathons; developed MindFlow AI during a Hack2Skill hackathon.
