+91-9113458404 — ashishmandal1889@gmail.com — Bengaluru, India — [GitHub](#) — [LinkedIn](#)

## Professional Summary

Computer Science undergraduate with hands-on experience in full-stack web development using the **MERN stack** (**React.js**, **Node.js**, **Express.js**, **MongoDB**) and **MySQL**. Built and deployed two production web applications with secure authentication, RESTful APIs, and cloud integration. Strong foundation in **Data Structures & Algorithms** (**Java**), **OOP**, **DBMS**, Operating Systems, and Computer Networks. Seeking a Software Engineering / Full-Stack Development internship to apply and grow these skills.

## Education

**SEA College of Engineering and Technology (SEACET), Bengaluru**

**2023 – 2027**

*Bachelor of Technology in Computer Science Engineering* — CGPA: 7.8

*Visvesvaraya Technological University (VTU)*

## Technical Skills

**Programming Languages:** Java, JavaScript (ES6+), SQL, Python

**Frontend:** React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS, EJS

**Backend:** Node.js, Express.js, RESTful APIs, JWT, MVC Architecture

**Databases:** MongoDB, Mongoose ODM, MySQL

**Developer Tools:** Git, GitHub, Postman, Cloudinary, Render, Vercel

**Core Concepts:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile

## Projects

### Wanderlust – Full Stack Property Rental Platform

[Live Demo](#) — [GitHub](#)

*Node.js | Express.js | MongoDB | Mongoose | EJS | Bootstrap | Passport.js | Cloudinary*

- Architected a full-stack property rental platform using MVC design, with secure user authentication, authorization, and session management via Passport.js.
- Designed and implemented RESTful CRUD APIs for property listings and reviews, integrated with MongoDB for persistent, scalable data storage.
- Integrated Cloudinary for cloud-based image storage and built a fully responsive UI with Bootstrap and EJS across devices.
- Deployed a production-ready application on Render with MongoDB Atlas, ensuring reliable uptime and scalable cloud hosting.

### Narrivox – AI YouTube Script Generator

[Live Demo](#) — [GitHub](#)

*Node.js | Express.js | JavaScript | HTML | CSS | OpenAI API*

- Built an AI-powered web application that generates structured YouTube scripts from user-defined topics and tone, using the OpenAI API and custom prompt engineering.
- Designed a Node.js/Express.js backend with context-aware content generation, applying prompt engineering techniques to improve response relevance and consistency.
- Built a responsive frontend with seamless API integration, robust input validation, and comprehensive error handling to ensure a smooth user experience.
- Followed RESTful architecture best practices, using Git and GitHub for version control and iterative development.

## Certifications

- Artificial Intelligence Fundamentals – IBM SkillsBuild
- Introduction to Data Analytics – Coursera

## Achievements & Activities

- Participated in Web3/Blockchain hackathons and developer community events, including the Aptos Ctrl+Move Hackathon and KRNL Dekoded.
- Volunteered in coordination and operations for college technical events.
