ASHISH KUMAR

Aspiring Machine Learning Engineer | AI Engineer

Bengaluru, India | +91-9113458404 | ashishmandal1889@gmail.com

Portfolio | GitHub | LinkedIn | LeetCode

Professional Summary

Computer Science undergraduate graduating in 2027 with hands-on experience in Python, AI-powered applications, machine learning fundamentals, and backend development. Familiar with data preprocessing, model training and evaluation, Generative AI, and REST API integration. Interested in developing practical intelligent systems and AI-powered applications.

Education

B.E. in Computer Science and Engineering *2023 – 2027*
SEA College of Engineering and Technology, Bengaluru **CGPA: 7.8/10**
Visvesvaraya Technological University (VTU)

Technical Skills

Programming: Python, Java, JavaScript, SQL
Machine Learning: ML Fundamentals, Supervised and Unsupervised Learning, Model Training and Evaluation
AI Fundamentals: Deep Learning Basics, Neural Networks, Generative AI, LLM Fundamentals, RAG Basics
Data Science: NumPy, Pandas, Scikit-learn, Data Preprocessing, Exploratory Data Analysis
Computer Vision: Basic Fundamentals
Backend: FastAPI, Node.js, Express.js, REST APIs
Tools: Git, GitHub, Docker, Linux, Jupyter Notebook, AWS

Experience

Machine Learning Engineer Trainee & Intern *Code Unnati | SAP & Edunet Foundation*

- Undertaking Machine Learning Engineer training through the Code Unnati programme by SAP and Edunet Foundation.
- Learning machine learning concepts and developing practical skills through training and internship activities.
- **Programme:** Code Unnati Official Website

Full Stack Development Intern | Thiranex *2026 – Present*

- Working on full-stack development tasks and developing a responsive portfolio website to showcase technical skills and projects.

AWS Cloud Infrastructure & Monitoring Automation *Feb 2026 – Mar 2026*

Technical Project | AWS, Python, Bash, Linux

- Configured AWS VPC, public subnet, Internet Gateway, route table, and EC2 web application deployment.
- Implemented IAM access to S3, CloudWatch CPU alarms, SNS notifications, and EBS snapshots.
- Automated Apache log archival and S3 backups using Bash and cron; developed Python scripts for log analysis.
- **Links:** Live Demo | GitHub

Projects

SentinelSOS – AI-Powered Women Safety System *Python, FastAPI, PostgreSQL, Scikit-learn*

- Contributing to a women's safety application with emergency SOS, trusted contacts, location sharing, and area-level risk analysis.
- Working on location-based risk estimation using Python, data processing, and machine learning fundamentals.
- Contributing to ML and FastAPI integration, PostgreSQL connectivity, API testing, and Docker-based development. GitHub

MindFlow AI – AI-Powered Reflection Platform *Node.js, Express.js, Firebase, Gemini API, Docker*

- Built an AI reflection platform using Gemini API for contextual responses, sentiment analysis, and SMART goal generation.
- Implemented Google Sign-In with Firebase Authentication and persistent conversation history using Cloud Firestore.
- Developed REST APIs and containerized the application with Docker; deployed on Render. GitHub | Live Demo

Narrivox AI – YouTube Script Generator *Generative AI, API Integration, JavaScript*

- Developed an AI-powered application that generates YouTube scripts from user-provided topics and prompts.
- Integrated a Generative AI API to produce structured and context-aware script content.
- Created an interactive interface connecting user inputs with AI-generated results. GitHub | Live Demo

Wanderlust – Travel & Property Listing Application *Full-Stack Web Development*

- Developed an Airbnb-inspired application for exploring travel and accommodation property listings.
- Built property listing functionality and an interactive browsing experience for users.
- Integrated frontend and backend functionality into a full-stack web application. GitHub | Live Demo

Personal Portfolio Website *React, JavaScript, Responsive Web Development*

- Developed and deployed a portfolio website showcasing technical skills, projects, and professional experience.
- Created a responsive interface to present projects and professional profile information.
- Integrated navigation to GitHub, LinkedIn, repositories, and contact information. GitHub | Live Demo

Publication & Certifications

Publication: "Smart Waste Monitoring System for Sustainable Smart Cities," International Journal Research Publication Analysis (IJRPA), Vol. 2, Issue 1, January 2026. DOI: 101555/ijrpa.5184.

Certifications: Artificial Intelligence Fundamentals – IBM SkillsBuild; Building RAG Apps Using MongoDB – MongoDB; Observability for AI Agents – MongoDB; Data Analytics Essentials – Coursera.

Achievements

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
- Participated in Aptos Ctrl+Move and KRNL Dekoded hackathons.
- Built MindFlow AI during the Hack2Skill hackathon.
